

REMARKS

The above-identified application has been amended to set forth the relationship between this application and earlier filed related applications.

In addition, the specification has been amended to expressly set forth subject matter from Sulc et al U.S. Patent 5,270,415, which had been incorporated by reference in the original application (at page 9, lines 7 to 9). The subject matter now expressly disclosed in the above-identified application is from column 3, lines 59 to 66 of Sulc et al U.S. Patent 5,270,415. The last paragraph added to the present specification is fully supported by the express disclosure and context of the above-identified application.

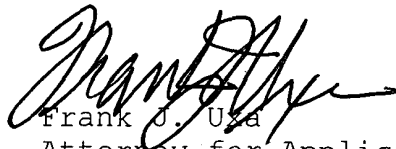

Therefore, applicant submits that the amendments to the present specification include no new matter.

Claims 1 to 35 have been canceled, without prejudice.

New claims 36 to 64 have been added and are directed to embodiments for which patent protection is sought. Each of these claims is fully supported by the present specification.

Applicant requests early and favorable action in the above-identified application.

Respectfully submitted,

Frank J. Uza
